

## G-kit Bonanza Extension

This is an expansion module for your Bonanza grow-box, it provides an extra 1m<sup>2</sup> of space. It is ideal to work with smaller lighting systems up to 600W. It includes 2 G-Tools Bonanza air in-lets that let the air in but not the light, anchorage points for fan, filter and lighting. It fits in any corner of your house, adapts to any indoor space.

The bonanza clever air in-let system, lets the air in, but prevents the light from getting out. The G-tools air in-lets breathe their air in through the bottom back panel of the cabinet. Aluminum U-profiles are supplied to mount carbon filter, reflector, etc to the ceiling of the cabinet. The ceiling has a round hole (150mm) with an air vent for fixing the air extractor fan.

It doesn't contain any flammable materials and it is easy to transport, as it is packed in two cardboard boxes.

One flat box for the panels and one box for the aluminum profiles and connectors.
