

G-kit Box For Microgreens And Wheat Grass

The Sprouter is the ideal cabinet for growing wheatgrass and other sprouts automatically. It includes lighting, ventilation and irrigation system, what makes it very practical and easy to place in most of the conditions.

It is very easy to build and you can quickly start using it. At the same time, its modern design makes it attractive as a piece of furniture for your house. Its technology and materials (plexiglass doors) allow visibility of the growing process. The cabinet produces around 70 shots of wheatgrass of 30ml per week.
