

Grow tables G-Tools

These grow tables are made for use in combination with Danish trays. The aluminium frame together with the plastic G-tools connectors, form a sturdy construction, carrying capacity 150kg/m². They can be set up and broken down within 10 minutes. Because of the insert connectors, the tables can be set up and taken down endlessly. The tables are packed in cardboard boxes of 80 x 15 x 15cm. The compact size of the packing makes them very easy to store.

These tables can also be bought as part of a complete irrigation system.
