

BH - Noise-free ledgrow light

Description

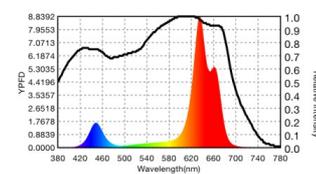

This is an updated version of the famous Hans-panel. Not only is it ALL CREE, but it also has no fan, but passive cooling and is therefore totally silent. All my panels are quite large compared to the amount of power; therefore extra cooling is hardly needed and these simple heat-sinks are all that's needed to create a fan-less panel. Most rooms will have an oscillating fan because the plants need the air to circulate, such a ventilator to gently move the air in the room around, is recommended. All electrical parameters are identical to the standard 70 Watt Ledgrow panel.

*""That sounds great, thank you for the excellent customer support!
Have a nice day""*

Why Hans Panels?

- * There are numerous positive reviews of my panels on the forums, they haven proven themselves again and again
- * I fully understand the importance of continuity, I do my very best to offer service of the highest level. If a malfunction would appear, a replacement will be send immediately, all you need to do is promise to return the defective product.
- * I only use the very best led's, just Cree. The efficiency and of these leds is over 30% better than the cheaper brands like Epistar and Bridgelux, those and worse you will find in the China made products.
- * I think growing with Leds is rapidly becoming accepted, the exclusivity is in the past, in order to stimulate the wide use of Led panels I keep my prices very modest.

Technical information

- * All Cree XBD and Cree XPE Deep Red LED Power, total power consumption max 75 Watt
- * 2 selectable positions; (1) Seedlings, Mothers and Early weeks of flowering, and (2) Full flowering position. Easily selectable by switch
- * All CREE; 4 Cree XBD Royal Blue, 21 Cree XBD 701 Red, 2 Cree XBD White and 6 Cree XPE Deep Red Led's

- * Each Led has it's own reflector, either 106 or 123 degrees, therefore optimal control of the light pattern
- * Metal Core PCB for the very best cooling
- * No light losses caused by glass or plastic barriers in front of the LED's
- * External waterproof power supply, no heat contribution to the LED's
- * Power supply with 2 meter cable, easily unpluggable.
- * Size 26 cm * 38 cm * 6 cm, 10" * 15" * 2.3"
- * Recommended maximum grow area 50*60 cm, 20" * 24"
- * EU, USA or UK power supply included
- * Reflector easily demountable for cleaning
- * Solid construction, simple industrial design
- * No sound at all, 100% silent
- * Hanging kit included
- * 2 year warranty
- * Shipping all around the planet
