

Canna - Terra Professional Plus

With Terra Professional and Terra Professional Plus we offer high quality soil mix, tailored to the needs of vegetable and fast growing plants. These culture media are part of the Terra line associated with plant food.

Terra Professional (Plus) Soil mixes are made for growing vegetables and fast-growing plants. Because of the structure and water / air management can create ideal conditions for such plants. You make the most of these mediums to grow in a pot. When grown in the ground, use the soil mix to enrich the garden soil. Both culture media are completely organic, homogeneous structure and free of harmful viruses and fungi.
