

Vaporizer - Summit+

A very resistant portable vaporizer from Vapium.

The Summit+ is a strong vaporizer ideal for outdoor use, with a comfortable size to satisfy on-the-go needs. Vapium created this advice for adventurous users, guaranteeing an efficient performance in severe climate environments. For self-maintenance, the Summit + is constructed for splash and dust protection, including a stir tool built in.

The new Summit design comes with outstanding airflow enhancements, next to an airway pathway laser bonded from stainless steel. It is powered by an improved rechargeable 3300mah lithium-ion battery, that can be charged during the use of the vaporizer. Also, an impressive heating time of 45 seconds / 1 minute depending on the setting makes this a very smooth and efficient advice.

Vapir offers a number of accessories for the Summit+ that will make it even more fitting to the use on-the-go and the outdoor lifestyle.
