

Vaporizer - G Pen Elite

A portable vaporizer from Greenco Science

The G Pen Elite is an ergonomically designed vaporizer that suits perfect in your hand. It is powered by two compounds: a lithium-ion battery and smart-chip technology; as a result you get a quite extended battery life. It includes a shiny LED display that indicates levels of temperature and battery.

This vaporizer is suitable only for dry herbs, and it operates with an all ceramic heating cell that heats from all sides in a temperature range of 93°C - 220°C.
