

## DNA Genetics - Cannalope Haze

Haze Brothers x Mexican (Michoacán)

This strain is renowned for its very melon and sweet smelling buds. This translates into a very nice taste and smoothness on both the inhale and exhale. The high is heady hitting in the temples and eyes. She is a good yielder and an easy to grow plant that is a fast finisher. Mild Haze qualities with an expansive smoke and good resin production results in great water hash.

The Cannalope is a great strain to breed with because of its low flowering time. 1st CABA Cup 2010 Buenos Aires 2nd Sativa IC420 Breederscup 2005 3rd Sativa IC420 Breederscup 2004
