

DNA Genetics - Lemon OG Kush

Lemon Skunk x The OG #18

This is the true Lemon OG Kush made from scratch using the Las Vegas Lemon Skunk cut and crossing that to the The OG #18 cut. What resulted is a good yielding high calyx to leaf ratio flower with a incredible lemony fuely taste and smell.

The Lemon OG Kush also has very good medicinal values, helping cancer patients that are going through chemo therapy, helping with appetite, as well as helping the doctor who needs to relax from a stressful day. Flowering in 8-9 weeks will give the grower the opportunity to grow multiple crops within a year. This is by far is the most Lemony of all the OG Kush crosses, and soon to become a crowd favorite. No need to pinch or top, the Lemon Kush stays short for a OG Kush variety.
