

G.Y.O Collection - R.K.S.

Afghani x Columbian x Thai

R.K.S. offers a strong smell similar to the skunk. If you like stinky and sticky green then this is the right choice for you. High calyx to leaf ratio and good yields makes the R.K.S. the perfect plant to grow indoors or out.

She will finish in the first week of October outside, and if this strain is grown inside, good carbon filtration is a must because she will stink. She's got a great old school flavor with a high that is up and very strong.
