

Reserva Privada - Sour Kush

Sour Diesel x OG Kush

The Sour Kush, formally known as Headband, has a great yield, and the high is completely medical and not too over-powering. Finding a keeper mother is easy in a pack of 6 and this plant clones easily as well, rooting in 8-10 days. She grows fast in vegetive stage and spreads out wide to produce many tops and an even canopy.

Producing heavy resin early and a great aroma, our Sour Kush has bag and head appeal. She doesn't grow as tall as Sour Diesel or as stretchy as the OG Kush and is not so picky with the nutrients. She has a fuely-soury taste and smell with a long lasting high. She is a good all day smoke that won't knock you down like some of the heavy indicas and is a good strain for anxiety.
