

Brass pipe de luxe

Try this quality brass pipe that has been designed after the original proto-pipe deluxe pipe that has been around for years. It comes with all the gadgetry you would expect including a stash chamber and resin ramrod.

Cleaning this pipe has been made easy as the pipe parts come completely apart so you can easily clean out all that trapped herb. You don't need to use metal screens as the pipe has a solid metal bowl with holes cut in it that can also be easily cleaned.

The brass chamber that twists into the bowl can hold a good amount of herb. The weight of the pipe is not more than a few ounces and due to its size, it can easily fit into your pocket or bag when not in use. The swivel lid on the bowl will keep your herbs safe when you are not using the pipe.

If you are looking for a great performing, durable and portable device to enjoy your herbs on your own or with friends, then this pipe is a great choice and it makes a great gift.
