

Share the pipe

After the success of the first edition of this award winning pipe, we are very proud to announce the launch of the second generation: Share The Pipe or Share II .

The Share II is cool in every sense of the word. Smoke is cooled by traveling around the internal cooling system so ensuring a good and smooth delivery of the goods. The Limited edition colored heatsink coat gives a very aesthetic and visually pleasing appearance to this wonderful creation and also means the pipe is always cool to the touch even during the heaviest of sessions.
