

GE - Lucalox XO

Lamps of high pressure sodium Lucalox™ XO GE offer excellent luminous efficacy, lumen maintenance, long life, reducing maintenance costs and energy consumption.

The Lucalox™ XO lamps are very robust and made with a very reliable construction, developed to meet the most diverse needs. They are built with fewer components and only 5 welding points. Simplicity and robustness provide greater reliability. Furthermore, they are compatible with magnetic, electronic ballasts approved by GE.

- Monolithic solid tube with reliable GE technology starter for increased reliability.
- High luminous efficacy up to 146 lm / W
- Extra Brightness, up to 20% more lumens than the standard
- More resistant to voltage fluctuations
- System reagent tank made in zirconium, material for better lumen maintenance
