

Sylvania - Grolux

Mixed (growth and flowering)

Lamp high pressure sodium, high quality, with a strengthening of the blue and with 20% more red than other conventional lamps.

The use of this lamp will result in abundant flowering. It can also be suitable for plant growth (vegetative phase) but not for mothers and plant cuttings.

The color of these lamps is mainly red and highlighted in these orange, red and yellow tones that guarantee the best light on plants and produce in them certain effects such as production of more flower stalks, and fattening of the flowers.
