

Vaporizer - Muad-Dib Concentrate Box

The Muad-Dib Concentrate Box contains everything you need to easily, quickly, and safely vaporize concentrates, oils, and herbal extracts. A tiny, pin head sized amount is all you need for a sensational experience.

The Concentrate Box uses the same simple patented technology as the Launch Box, but with a smaller and user-replaceable screen design that reaches 480°C in just three seconds. The Concentrate Box uses the same batteries as the Magic-Flight Launch Box, but drastically improves on battery life, allowing you 50+ uses on a single charge.

Due to the high heat produced by this vaporizer, a 1.5 ft black silicone draw whip with brass ends is included in place of a draw stem to help cool the vapor stream.

Please note: this product does not vaporize dry herbal material, it is for concentrates only.

Contents
