

Southseeds - CBD Critical Mass

Southseeds Skunk#1 feminised will grow over 1 metre tall, up to 1.5 metres, yielding a giant main cola. Grown indoors on average it will bring a yield of 450-500 per square meter or between 500 grams per plant. Grown outdoors, it prefers a warmer climate such as in Spain, Italy or California.

Due to her relatively short flower time it can be grown in more northern latitudes (Netherlands), however, will not reach its full potential as it would indoors. Flowering will be finished after 7-8 weeks.
