

Mammoth - TCL

Mammoth TCL lighting is ideal for a microculture. High efficiency and very low power consumption, this light is very interesting for beginners.

Very little heat, so they can stand close to the plants.

TCL lamps are available for all stages of your plant:

- * 2700 degrees - Yellow: Flower (Yellow Blooming)
- * 6500 degrees - Day White: Growth and mother plant (DayLight Growing)
- * 9000 degrees - Sky Blue: propagation and cuttings (BlueSky Cutting)
