

THSeeds - Dawg Star Kush

The DAWGSTAR is a cross between DarkStar (Purple Kush x Mazar I Sharif) our last champion and Chemdog (OG Kush x Sour Diesel), the variety made famous by Hollywood stars, with more internet searches than any other. It is a therapeutic variety and because its high level of CBD and CBN it is perfect for users who have both strong chronic pain, even for those who suffer from insomnia, as the narcotic effect of the plant will let you sleep and rest overnight. Apart from its therapeutic effects, this variety is a pleasure that meets all our senses at once. The smell is strong and heavy with a sweet taste. With nuances that can get us to remember damp earth and pine, which will surprise anyone who tries.
