

## AutoPot - 1Pot XL

The 1Pot XL module is extremely versatile and can be used in the greenhouse, polytunnel, garden or home to water and feed your plants whether using hydroponics or any medium of your choice. It offers an easy and efficient watering system for tomatoes, cucumbers, chillies and all manner of crops whether edible or ornamental.

Whatever medium you choose the 1Pot XL system caters for gardeners and growers of all abilities guaranteeing great results. The 1Pot XL System is easily extended so many pots can be linked to a single tank. The pots & trays can be easily moved at will, if the plants grow too large they can be spaced further apart with ease. Once set up and a tank is filled with water & liquid feed this extremely versatile system will completely take care of all your plants needs.
