

DAVIN - Fan Controller DV-12

The Davin DV-12 is a relay with a timer that allows two devices to be connected and off. Typically, this is used for turning on and off of an HPS lamp (s). The DV-12 can connect up to two HPS lamps of 600 watts.

Technical data:

- * Timer: adjustable per 15 minutes
- * 2 x 600 or 2 x 400 Watt Watt
- * 2 sockets
- * Required power: 230 V / 50 Hz
- * Maximum power: 6 Ampere
- * thermal protection
- * Isolation level: IP 44
- * Dimensions: 110 x210 x 70 mm
- * Warranty: 1 year manufacturer warranty

The DV-12 has a thermal fuse of 6 Amps. This will switch the DV-12 itself off at an overload or short circuit.

Davin relays and switch cabinets are of very high quality and all products are tested individually. All products come with a certificate CEE and come with original test certificate.
